

ADITHYAN S

WEB DEVELOPER & DESIGNER

As a Front-End Developer, my role involves designing and building user interfaces for web applications, ensuring they are functional, visually appealing, and responsive. I take UI/UX designs and bring them to life with HTML, CSS, and JavaScript, creating intuitive and smooth user experiences. I collaborate with back-end developers and designers to build scalable and user-friendly solutions, while focusing on optimizing performance and ensuring compatibility across different browsers. When issues arise, I troubleshoot and resolve them efficiently to maintain the quality and reliability of the user interface.
